2. Do these sites have tank monitoring? For example, a Veeder-Root to remotely get fuel levels for making deliveries? **Yes, we have tank monitoring devices on all of our tanks, but this bid is for a card reader system only which will provide a reporting system for Baldwin County of the fuel that is used daily. The County provides all fuel for all our backyard sites. No fuel will be purchased from the successful vendor off this bid for the backyard sites. The County has a fuel bid in place at this time that we purchase our fuel from.**

3. What is the volume at each site on a monthly or annual basis?

The County consumed during the period of January 1, 2024, through December 31, 2024, approximately 554,817 gallons of regular unleaded gasoline; and approximately 471,983 gallons of Clear Diesel; quantities vary from year to year due to the increase/decrease of the County's fleet.
