ELWOOD LEE JOHNSON, JOSEPH COLVIN,
AND GEORGE COLVIN

Now come the above named defendants, Elwood Lee Johnson, Joseph Colvin and George Colvin, and show to the Court that they are each now confined in the jail of Baldwin County, Alabama, under a commitment issued by Justice of the Peace Court of Hon M. R. Howell, of Foley, Alabama, charged with the offense of second degree burglary. The said defendants further show that they have each been committed to jail for more than fifteen days; and that each desires to waive indictment by the grand jury and plead guilty to said offense charged against them.

The Court having ascertained that the defendants have not engaged counsel to represent them, now appoints Hon W. C. Beebe, a member of the bar of this court, to represent the defendants Elwood Lee Johnson, Joseph Colvin, and George Colvin on the hearing in this matter. It is, therefore,

Considered, ordered and adjudged that Kenneth Cooper, as Solicitor of the 28th Judicial Circuit of Alabama, the prosecuting officer of Baldwin County, Alabama, do forthwith prefer and file against the said defendants on information under oath, accusing the said defendants with the said charge of second degree burglary; or said information may be under the oath of some witness having knowledge of said offense.

Let the clerk hand a copy of this order to the said solicitor.

Dated this 29th day of December, 1950.

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The *Agrobacterium* strains were cultured in YEA medium for 24 h at 28 °C. The cell concentration of the strains was adjusted to 1.0 × 10⁸ cells/ml. The cell suspension was then diluted with distilled water to obtain the desired concentration. The cell suspension was then inoculated into the plant tissue. The transformation efficiency was determined by the number of transformants per plant. The data were expressed as the mean ± SD of three independent experiments. The significance of the difference between the control and the treatment was determined by the Student's *t*-test. The results are shown in Table 1.
